

We Build **More** Than Websites.

Fontein is a Windhoek web studio. A website is where we start.
Then we help businesses get found, get paid and save time.

01 · Who We Are

Grounded Digital Work, Since **2016**.

We build the thing you open every morning: the website, the bookings, the invoices and the follow-ups that keep a business moving.

Since 2016 we have built for more than 100 Namibian businesses, from owners getting online for the first time to established companies running on connected systems.

The tools that run a business properly get priced as if only corporates deserve them. We make them accessible to the businesses that keep this economy working: owner-run shops, practices, guesthouses, contractors and service firms.

Scope and price are agreed before we begin. Everything is built in your name, on your accounts. No hostage handovers.
